

SNOW PLOW OPERATIONS UPDATE

Winter is just around the corner, and many questions have been brought up about snow clearing on 20th Ave. With the reconfiguration of Main Street, the Town of Coaldale Roads, Public Works, and Parks and Recreation departments have collaboratively created an efficient plan for snow removal on the street AND sidewalks during large snow events between 17th Street and Highway 845.

The new pilot program advises that Parks and Recreation will clear snow from the sidewalks onto the street. Subsequently, the Roads department will clear snow off the streets to complete the removal process. This plan will help establish a quicker turnaround time for snow removal on Main Street, allowing staff to move on to clearing other priority routes such as school sidewalks earlier in the day.

As per the Town's existing Snow Removal and Sanding Policy, snow plowing and removal should commence on a prioritized basis when 10 cm (4") of snow has accumulated. Main Street businesses will remain responsible for snow removal on their properties outside of these events.

The new snow removal program will be undergoing continued evaluation throughout the 2020-2021 snow season. We ask for your support as we gain knowledge and make adjustments.

If you have any questions or concerns, please contact Justin MacPherson, Director of Operational Services at justin.macpherson@coaldale.ca.

YOU'RE INVITED TO THE MAIN STREET BLOCK PARTY!

The Town of Coaldale's Main Street has been undergoing construction to deliver necessary upgrades to aging sanitary infrastructure and to provide visual and functional enhancements to the streetscape. The project has seen a number of added benefits in the way of pedestrian and road safety improvements, barrier-free design elements, and new street furniture to add an eclectic blend of traditional and modern aesthetic enhancements.

"It is great to see the recent repair and major upgrades to Main Street," said John Pollemans, Owner of Pollemans Homes & Rentals. "The lighted intersections, trees, benches, and wheelchair accessibility will attract more business investment and drive customers into the downtown core."
