

MAIN STREET PROJECT ACHIEVES NEW MILESTONES

Main Street upgrades are well underway. The 17th St intersection is now open to traffic, with the 18th St intersection soon to follow. Tollestrup's crew has started working on the underground sanitary infrastructure upgrades along the 19th St intersection as well as widening the sidewalks and installing bulb-outs.

Tollestrup has also updated the pedestrian and vehicle map (below) as the project progresses. These maps are intended to help residents navigate the streets throughout construction to create minimal disruption for the Main Street businesses. The map is also posted on the Coaldale Main Street Revitalization web page.

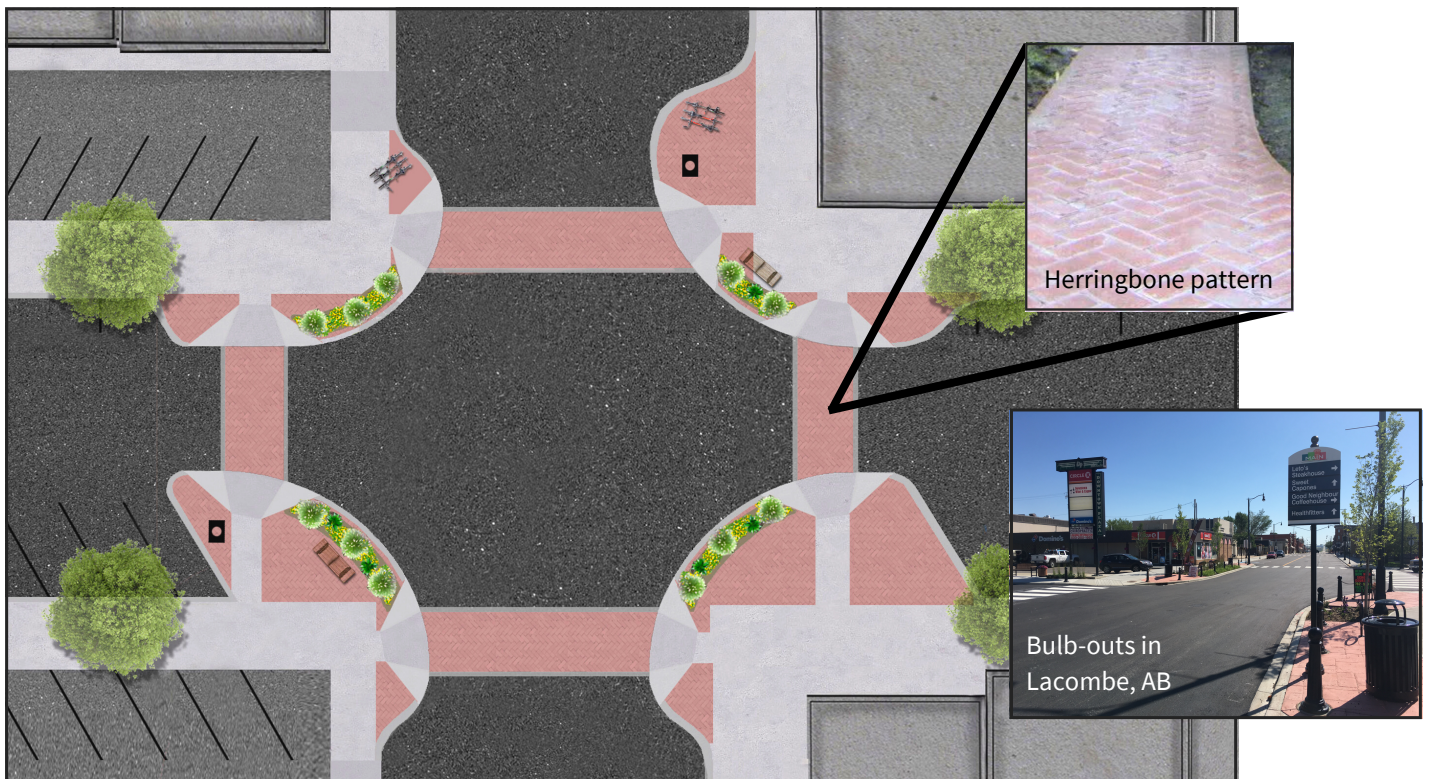

WHAT'S NEXT? ESTIMATED MAIN STREET TIMELINE

What's next for the Main Street Revitalization project? For now, the timeline remains unchanged, but be sure to keep an eye out for any updates on our website - www.coaldale.ca/main-street-revitalization.

BULB-OUT AND CROSSWALK DESIGNS FINALIZED

After consulting with the Main Street business owners and stakeholders, the designs for the bulb-outs and crosswalks have been selected! The designs incorporate beautiful landscaping, space for street furniture, and pedestrian ramps for maximum accessibility. The bulb-outs and crosswalks will be a distinct red colour to increase pedestrian visibility and add an element of interest to the public realm. The herringbone pattern will also add character to Main Street that will distinguish the area from other parts of town.

WHEN THINGS DON'T GO ACCORDING TO PLAN

Tollestrup Construction Inc. has been committed to maintaining frequent and proactive communication between businesses and stakeholders throughout Main Street construction. However, it is important to keep in mind that, with all things in life, some things don't always go according to plan. If there is an unexpected development or change in the project that wasn't announced ahead of time, please understand that the construction crew requires the flexibility to make quick decisions in the moment that ultimately make the project move along faster but will not impair people for long periods of time.

COMING SOON... New Business Spotlight coming soon! Stay tuned for the next issue of The Main.
